PURE ICE

Equipped with a UV lamp for all-day sterilization, destroying the DNA of bacteria, viruses, and other micro-organisms, with a sterilization rate of up to 99.9%. Effectively cleans tanks, pipes, and ice to ensure clean and hygienic ice. And the industry's fastest 2-minute auto-cleaning is easy and quick to operate, which avoids forgetting, and ensures that the ice room is always clean and running efficiently.

99%+
Sterilization and
Deodorization

PURE AIR

PureAIR keeps your food fresh and your family healthy by eliminating harmful bacteria while preserving original flavors.

- 99.99%+ Sterilization rate
- 99%+ Deodorization rate

HYDROFRESH 2.0

HydroFRESH 2.0 extends the freshness layer from one to two. The upper drawer is suitable for storing fruit, while the lower drawer has a higher humidity which provides an ideal storage environment for vegetables.

FRESH HUB

The Fresh Hub's 3 variable temperature settings provide the best storage environment for different ingredients. It is also equipped with a 7mm aluminium super-conducting plate to accelerate the temperature conduction and further lock the nutrients and flavours of ingredients.

i-Touch OPEN

Effortlessly open the refrigerator with any part of your body, even through clothing. The uniform speed door opening motor provides smooth and quiet operation.

PureBio

Featuring an advanced silver-ion (Ag+) catalyst, PureBio effectively neutralizes unpleasant odors and inhibits bacterial growth, prolonging food freshness through scientifically enhanced preservation.

ORIGIN INVERTER

Inverter compressor and inverter fan. The fan automatically senses changes in the compressor's cooling capacity and adjusts speed in 4 levels.

JADE TEXTURED GREY

With its warm beige shade like the soft glow of amber, the refrigerator adds a touch of refined Eastern elegance to the kitchen, effortlessly blending into the cozy family atmosphere.

DUAL COOLING SYSTEM

It features two independent evaporators that provide optimal cooling performance and precise temperature control in both the freezer and refrigerator compartments. This prevents flavour transfer and maintains the original taste and freshness of ingredients, ensuring a fresher, healthier storage environment.

-30°C DEEP FREEZE

-30°C ultra-low temperature minimizes damage to the cellular structure of ingredients by generating smaller ice crystals, ensuring that the ingredients are fresh while maintaining their original nutrition and quality.

❄️ CHEST FREEZER ❄️

INVERTER COMPRESSOR

As the intelligent heart of the freezer, our advanced inverter compressor dynamically adjusts power to deliver rapid cooling and consistent temperatures. This translates into significantly lower electricity bills and quiet operation for your home.

-36°C DEEP FREEZE

Our -36°C Deep Freeze mode surpasses conventional freezing, utilizing high-efficiency R290 refrigerant to rapidly lock in freshness at the cellular level. It perfectly preserves the original texture and nutrients of premium seafood and meats.

PRECISE TEMPERATURE CONTROL

Ditch the guesswork of analog thermostats. Our electronic control allows precise 1°C adjustments within a wide range, offering unparalleled flexibility to perfectly preserve everything from fresh produce to specialty frozen goods.

SILVER ION DEODORIZATION

Experience a truly fresh freezer. The system removes 91% of food odors to prevent mixing, while its 99% antibacterial action* inhibits spoilage. This dual defense maintains a neutral environment and protects the taste and texture of your stored food.

100H NO POWER NO MELT

While other products fail after a power outage, our freezer's superior insulation and sustained cooling capability keep food frozen during extended power outages, remaining perfectly preserved even after days without electricity for up to 100 hours.

HYGIENE CARE

Keeps daily clothes safe & hygienic effortlessly

It is crucial to keep the daily items we use clean and safe in order to protect ourselves. Hygiene sanitization with UV light can effectively eliminate bacteria and other invisible threats that may lurk deep within the fibers, providing maximum protection for the family.

HEAT PUMP SYSTEM

Gently dry clothes at the ideal temperature

Garment shrinkage and damage are common concerns when using a dryer, especially for delicate garments. TOSHIBA's heat pump gentle drying technology keeps clothes at low temperatures, effectively preventing over-drying and helping maintain the original softness and comfort of garments.

LUXECARE

Waterless clothes care expert

Equipped with an independent steam generation device, it generates powerful small molecular steam, which can quickly penetrate deep into clothing fibers at 360°. With one click, you can start professional drying care and easily care for waterless clothes at home.

5-LAYER LINT FILTER

Designed specifically for pet-owning families

The filter has been upgraded to a five-layer system, effectively collecting pet hair, pollen, dust, and more. This upgrade prevents secondary pollution of clothes and drum while also removing more pet hair from pet beds and clothing, making every hug even cozier.

REACTIVE OXYGEN TECHNOLOGY

Through electrocatalysis, water molecules are ionized to produce five types of Reactive Oxygen Species (ROS): O₃, ·OH, ·O₂, ·OOH, and ·O. These ROS oxidize and break down naturally peeling clothing dyes and stains in wash water, delivering enhanced color protection, deep whitening, and powerful stain removal.

GREATSTEAM

99.99%* sanitization

High temperature vaporizes water and generates hot steam that rises up to fill the whole drum space and contacts every corner of the clothes. Hot steam penetrates deep into the fibers and thoroughly saturates fabrics.

AROMA+

200%* extra fragrance

One click to lock scents and freshness. Thanks to TOSHIBA's great washing technology, stains are thoroughly removed and fragrance can be better activated.

SENSEDOSE™

One fill for multiple washes

TOSHIBA patented SENSEDOSE™ technology provides accurate and automatic detergent dosing to improve cleaning performance and avoid residues and waste.

2-in-1 CONTROL PANEL

Easy reach and convenient operation

The centralized 2-in-1 control panel enables seamless washer and dryer operation at eye level, reducing bending and dual-panel hassle.

HYGIENE CARE

Hygiene Sanitization with UV Light, 99.9%* Antibacterial

The antibacterial cycle reduces 99.9%* of bacteria on clothes with high-temperature drying and UV light. Prevent the build-up of bacteria on clothes, like coats, bedding and soft toys, making clothes more skin-friendly.

*Tested by CVC Testing Technology Co., Ltd.

DUAL INVERTER

Ultimate performance and drying experience. TOSHIBA's inverter compressor and motor adjust the drying speed and frequency to precisely control the temperature, creating ideal drying conditions for your clothes. This not only enhances drying performance but also better protects your garments during the drying process. TOSHIBA's technology offers users a smarter and more considerate drying experience.

**ORIGIN
COLOR**

REACTIVE OXYGEN TECHNOLOGY

Through electrocatalysis, water molecules are ionized to produce five types of Reactive Oxygen Species (ROS): O_3 , $\cdot OH$, O_2 , $\cdot OOH$, and $\cdot O$. These ROS oxidize and break down naturally peeling clothing dyes and stains in wash water, delivering enhanced color protection, deep whitening, and powerful stain removal.

HEAT PUMP

Energy saving gentle care

Heat pump warms up the airflow through a heat exchanger and precisely adjusts drying frequency with an inverter motor, preventing fabric damage from overheating. It ensures quiet operation, energy efficiency, and gentle drying for fabrics.

FOUR-LAYER PRECISION FILTRATION SYSTEM

ThHydrophobic Filter Design

A four-layer filtration structure can effectively trap lint, dust, pet hair, and fabric fibers. Upgraded hydrophobic filter design allows moisture beads off instead of soaking in. Lint and residue can stay on the smooth surface rather than being trapped inside. This makes the filter easier to rinse clean, helps reduce buildup over time, and supports a cleaner drying experience with minimal maintenance.

SENSEDOSE

One fill for multiple washes

Automatically measures detergent based on load size—no manual pouring, reduced residue, and effortless cleaning with one fill lasting for weeks.

SENSEDRIY

Precise temperature and humidity detection

MEMS2.0 integrates contact sensors (fabric surface moisture detection) and humidity/temperature sensors (drum environment monitoring), using AI algorithms to analyze both surface and inner-layer moisture for precise drying control.

CONDENSER LINT SELF-CLEANING

Cleaner machine, better performance

Automatically cleans condenser and ducts after every cycle to eliminate lint buildup, boost efficiency, and protect both clothes and machine longevity.

HEAT PUMP SYSTEM

Gently dry clothes at the ideal temperature

Garment shrinkage and damage are common concerns when using a dryer, especially for delicate garments. TOSHIBA's heat pump gentle drying technology keeps clothes at low temperatures, effectively preventing over-drying and helping maintain the original softness and comfort of garments.

HYGIENE CARE

Hygiene Sanitization with UV Light, 99.9%* Antibacterial

The antibacterial cycle reduces 99.9%* of bacteria on clothes with high-temperature drying and UV light. Prevent the build-up of bacteria on clothes, like coats, bedding and soft toys, making clothes more skin-friendly.

*Tested by CVC Testing Technology Co., Ltd.

LUXECARE

Waterless Clothes Care Expert

Equipped with an independent steam generation device, it generates powerful small molecular steam, which can quickly penetrate deep into clothing fibers at 360°. With one click, you can start professional drying care and easily care for waterless clothes at home.

Modern Styling

Seamlessly integrated with your cabinets, perfectly blending into your home environment, showcasing a simple yet elegant visual aesthetic.

EasyTouch Control

The ergonomic tilt improves visibility and readability, making the control panel easier to operate.

Deeper Clean

Get a deeper clean with RainSpray, and gentle color care with ColorAlive. Enjoy a better laundry experience.

4-Level Fragrance Care

250%* extra fragrance with 4-level adjustment. Precisely adjustable levels for balanced, comfortable freshness.

*Tested by TÜV SÜD Certification and Testing (China) Co., Ltd. Regular cycle compared to Regular + Aroma cycle. The data applies to 12kg, 13kg, 15kg machines.

Bigger Capacity

Large capacity for family laundry; designed to manage bulky items such as duvets and blankets, so you do fewer loads with less effort.

❄️ IH LOW SUGAR RICE COOKER ❄️

POWERFUL INDUCTION HEATING

Induction heating (IH) comes with magnetic power that heat the internal pot itself in the high temperature. The whole pot is heated evenly and quickly to delivers fluffy and tasty rice.

SUGAR-REMOVING BASKET

The #304 food grade stainless steel basket isolated the unhealthy digestive starch from rice into the water at the precise temperature while still retaining nutrients.

OPTIMAL SIMMERING PROCESS

The process provides the precise temperature and time under 300 pa micro-pressure. The rice is properly cooked to increase the amount of resistant starch (RS), which is not digestible in our bodies so it is not converted into fat or sugar. With #304 food grade stainless steel detachable inner lid.

3MM 7-LAYER INNER

Super thick with 7-layer inner pot transfers the heat evenly to deliver the fluffy and tasty rice.

Remove the unhealthy digestive starch by up to **41%***

Increase resistant starch by up to **79%***

ULTRA PURE AIR PURIFICATION TECHNOLOGY

Ultra PURE filter (PM1.0) can filter out dust that is invisible to the naked eye such as cigarette smoke, with an efficiency of over 85%.

Leuconostoc enzyme Has antibacterial and antiviral properties, especially against avian influenza virus (H5N1), reducing the number of bacteria and viruses that reproduce, ensuring health safety. The ability to inhibit bacteria up to 99.9%.

ANTI-FOULING TECHNOLOGY MAGIC COIL

During operation, water vapor will condense into droplets on the aluminum fins of the evaporator, making it easy for dirt, old, and bacteria to grow.

The air conditioner is coated with high-grade anti-fouling layer for aluminum fins, allowing water to flow away, carrying away dirt.

Optimizes air purification capacity and especially reduce maintenance and cleaning cost of air conditioner.

SAVE ECO POWER

ECO mode helps to cool efficiently and is environmentally friendly. The set temperature will increase by 1°C after 1 hour and will increase by a maximum of 2°C until the machine is turned off. This helps you save up to 25% of electricity when using it.

SELF-CLEANING FUNCTION

After pressing the POWER button once, the fan will continue to operate for another 20 minutes to dry the cold, limiting moisture easily to produce bacteria.

When you want to stop immediately, just press the POWER button 2 more times within 30 seconds.
